

# 20mm Rotomac<sup>®</sup> HS

For High Speed Testing of Small Diameter Wire, Rod, & Tube, for Longitudinal Defects

- Detect longitudinal surface flaws such as seams and laps
- Test product from 2 to 20mm (0.0787" - 0.7874") diameter
- Designed to operate at up to 18,000 RPM for high production speeds
- Highly sensitive non-contact testing with superior results
- New improved, easy to set up Distance Compensation, a critical factor in testing ovate wire.
- Simple adjustment tools, with convenient dial in diameter guide, adjust both probes simultaneously for dimensional changes.
- Quick twist-on bushing holders.
- Probes are easily centered on the test product's center of rotation.
- Simple probe replacement.
- Two spinning test probes.
- Meets all applicable safety requirements.
- Operates with MultiMac<sup>®</sup> eddy current electronics.

*Rotomac<sup>®</sup> HS Rotary*

#### ***Applications Include:***

- Continuous wire operations such as drawing, spring-making, and parts forming lines.*
- Straight and cut operations.*
- Operate in-line with straighteners or off-line in a separate test station*
- Ferromagnetic, non-ferromagnetic, and austenitic materials.*
- Testing round and ovate material.*
